About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over \$15 million (Cdn.) capital cost, or \$20 million in the Lower Mainland–Vancouver area. As of June 2010, the information in this published version of the BC Major Projects Inventory is prepared by Rene Corcoran, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information

Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location

Projects are listed according to eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, e.g., a municipality.

Updates

New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs

Cost estimates are general estimates from the information sources used.

Start and Finish Dates

Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status

Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design

As a new feature, the Major Projects Inventory has begun identifying sustainable building design and construction projects within the Inventory that have been registered and certified under a recognized green building rating system (e.g., LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.

Highlights of the December 2010 Issue

This issue of the BC Major Projects Inventory lists 41 new proposed projects over \$15 million for the fourth quarter of 2010, with available capital cost estimates totaling approximately \$1.4 billion in potential new capital investment, if all the projects proceed.

Thirty major projects started construction in the fourth quarter, with an estimated value of \$1.5 billion. The largest project started was the \$201 million Vancouver City Central Transmission (VCCT) Project in Vancouver. Construction is also underway on the \$165 million Fort Nelson Generating Station Upgrade and the \$165 million Heavy Vehicle Maintenance and Transportation Training Centre in Maple Ridge.

Twenty-two projects completed construction in the fourth quarter, with an estimated capital cost of approximately \$1.9 billion; the largest completion is the East Toba River and Montrose Creek Hydroelectric Project in Powell River valued at \$660 million, followed by the \$300 million Noel Gas Project in Dawson Creek.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time or the developer/owner requested that no capital cost be shown.

The capital cost of all major projects currently under construction in BC is estimated at \$61.8 billion, up slightly from \$61.7 billion reported in the third quarter of 2010. Many major project proposals listed are in very preliminary stages and are not approved for construction, therefore capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately \$114.2 billion, up from \$111.9 billion in the previous quarter. Approximately \$22.6 billion of projects are judged to be 'on hold' for the time being.

Victoria**Core Area Wastewater Management Project**

Capital Regional District Ph: (250) 360-3000

Plans for a proposed sewage treatment facilities for Victoria in a CRD report outlining five options: Clover Point in Victoria, McLoughlin Point in Esquimalt, University of Victoria in Saanich, near Royal Roads in Colwood, and Westhills Development in Langford. The Saanich and Colwood plants would potentially reclaim usable water and heat from sewage waste and the Hartland landfill in Langford would include a sludge processing facility. The District has passed recommendations for the McLoughlin Point in Esquimalt site for a liquids only treatment plant with a biosolids digestion facility possibly located at Hartland landfill. The recommendation would also see upgrades to Clover Point, Craigflower and Macaulay Point pump stations and the addition of underground storage tanks in Saanich. Core Area Liquid Waste Management Plan has received approval in a Provincial government review. The CRD will treat current sewage flows at McLoughlin Point in Esquimalt until 2030 and a biosolids processing facility will be built at the Hartland Landfill.

Delta**Roberts Bank Container Expansion Program Terminal 2 and Deltaport 3rd Berth**

Vancouver Fraser Port Authority Ph: (604) 665-9000
A container expansion program at Roberts Bank consists of two projects to increase capacity from the current 900,000 TEUs to 1.3 million TEUs: Terminal 2 and the Deltaport 3rd Berth Terminal Expansion. Terminal 2, with a cost of \$750 million, is a new container port at Roberts Bank, which involves filling and dredging, and would be located adjacent to the existing Deltaport Container Terminal. The Deltaport Terminal Expansion project, with a cost of \$400 million, involved constructing a third berth. Deltaport Constructors Ltd. were awarded the contract and completed construction in Jan 2010. The process initiated in Jun 2007 for the planning, building and operating of Terminal 2 is being re-evaluated due to market conditions. Preliminary project definition are underway with a seismic evaluation in Jul 2010 and a new Request for Proposals (RFP) for Container Capacity Preliminary Planning. In Jan 2008, the Fraser River Port Authority, North Fraser Port Authority and the Vancouver Port Authority, formed a single Canada Port Authority under the name Vancouver Fraser Port Authority.

North Vancouver**Lower Lonsdale Development Plan**

North Vancouver City Ph: (604) 985-7761 (North Vancouver City)
Six block development area comprised of 15 development sites (owned mostly by the City of North Vancouver) to include 1,600 dwellings in several buildings, a grocery store, retail outlets and a community centre. Site is bounded by Third St, St. George's Ave, Chesterfield Ave and Esplanade. Site 2 contains a 12-storey, 117 unit residential building named One Park Lane by the Millennium Group, which is complete. Site 3A, at 151 W. 2nd, has been sold to Seagate Properties Ltd. which completed construction on Sky, a 20-storey high rise with adjacent townhomes. The Fairmont Group's TIME development is also complete. The City will be marketing its lands over the next 5 to 10 years. Development plans for the area east of Lonsdale (Sites 9, 10, 11 and 12), consisting of 20.8 ha, were finalized in Fall 2004 and include residential towers and a waterfront area, and include the Pier Mixed Use Development which is being developed by Pinnacle International (see entry #438). The Ventana (entry #1741) is located on one of the remaining sites in the Lower Lonsdale development plan.

Valemount To Burnaby**Trans Mountain Pipeline Expansion (TMX)**

Kinder Morgan & Pembina Pipeline Corp. Ph: (403) 514-6638
New pipeline planned in stages, called TMX, along the existing Trans Mountain Line from Edmonton, AB to Burnaby, BC, which would eventually carry 640,000 barrels/day to BC, with connections to Washington refiners. The pipeline would loop Kinder Morgan's existing 1150 km, 60 cm pipeline with a new 76 cm pipeline. TMX-1 includes the building of 7 new pump stations and upgrading 6 existing pump stations in BC at a cost of \$210 million. This portion of the project completed 2007. TMX-2 includes 243 km of 30 and 36-inch pipe between Valemount and Kamloops and back to Edmonton at a cost of \$900 million. TMX-3 is a loop between Kamloops and the Lower Mainland at a cost of \$900 million. TMX may also be accessing a new northern leg in BC to a potential new deepwater port on the north coast (see project id 1566). Regulatory approval for the pipeline modification was received in fall 2006. Capital cost is estimated for BC portions. Website: www.tmxproject.com

Iskut

Red Chris Porphyry Copper/Gold Project

Imperial Metals Corp. Ph: (604) 683-0140

Proposed open pit copper/gold mine 18 km southeast of the village of Iskut, and 80 km south of Dease Lake, expected to process 30,000 tonnes/day of ore. The mine life is 25 years and could create 250 jobs. The proponent is a subsidiary of BC Metals Corp. The project received BC Environmental Assessment Act approval in Aug 2005 and was approved in 2006 by a federal environmental assessment. The Company submitted an application, under the Environmental Management Act, for the Mines act permit and the Effluent Discharge permit in Jul 2010. The financing for mine development has been secured with the condition that the power grid up the Hwy 37 corridor be extended to near the mine location. The Environmental Assessment process has been restarted for the Northwest Transmission line NWTL (see project id 2058).

STATUS: PROPOSED**Atlin****New Polaris Gold Mine**

Canarc Resource Corp. Ph: (604) 685-9700
 Reactivation and expansion of a former underground gold mine approx 100 km south of Atlin and 60 km east of Juneau, Alaska. Re-modeling, metallurgical testing and engineering of a portion of the gold resources, necessary for a 65,000 opy high-grade underground gold mine, is underway. A scoping study identified the potential to develop a 65,000 oz/year to 100,000 oz./year high grade, underground gold mine over the next three years. New office and refurbished camp complex now on site. New mine resource estimate released on Feb 2007 and the mine plan is expected to complete in Spring 2007. A feasibility plan and environmental studies will be carried out prior to government permitting. Website: www.canarc.net

Peace River Site C Dam

BC Hydro Ph: (604) 623-4472 Toll Free: 1-866-647-3334
Site C is a potential third dam and 900 megawatt hydroelectric generating station on the Peace River approximately 7 kilometres southwest of Fort St. John. It would be capable of producing approximately 4,600 gigawatt-hours of electricity annually - about 8 percent of BC Hydro's current electricity needs. Site C would deliver firm electricity with a high degree of flexibility. Site C was examined as a resource option over 25 years ago, with much more recent research and consultative work done, including technical work to bring existing information up to date, the Province decided to move forward with the project in Apr 2010. A multi-stage review process has been established for looking at Site C. Stage 1, involved a high level review of existing information, and Stage 2, extensive consultations with First Nations were completed. Stage 3 of the review is underway including independent environmental assessment, regulatory review, permitting and approvals. Construction will take about seven years and provide about 35,000 direct and indirect jobs throughout the project stages. Capital cost listed is an interim project cost estimate reported by BC Hydro in Dec 2007.
